PROFILE

I am a Software Engineer with a Masters degree in Computer Science and over twelve years of professional engineering experience. I have spent the last five years leading software engineering teams that have built world-class products using cutting-edge technologies. Looking ahead, I will focus on architecture, mentoring, and thought leadership driving best practices in software development and establishing the north star in technology vision.

EXPERIENCE

PwC, Tampa FL (Remote) — Software Engineering Manager

MAR 2020 - PRESENT

- Developed an enterprise cloud-based web application for a global accounting firm.
- Collaborated with business leaders to understand the business model, opportunities, and challenges.
- Worked with scrum masters and business analysts in an agile environment to manage development resources.
- Provided technical direction and mentorship for engineers.
- Upheld a high standard code and design principles by leading code reviewing sessions.
- Utilized Azure DevOps ecosystem, creating work items, reviewing pull requests, and deployment pipelines.

LoanLogics, Jacksonville FL (Remote) — Software Engineering Manager

OCT 2018 - DEC 2019

- Developed v1.0 of enterprise cloud-based web application for leading mortgage loan underwriting company.
- Worked with stakeholders to determine scope of project and staffing needs to complete the project by the deadline.
- Hired and mentored a team of 15 developers.
- Developed Angular v8 applications using the latest design patterns, such as NgRx, and connected to a Java Web API.
- Implemented microservices architecture for better scaling of independent development teams and fault isolation in production.
- Deployed in AWS DevOps ecosystem using Jenkins to deliver docker containers to a cluster of Amazon EC2 instances.
- Tested code with Jasmine, Karma, and Cypress.

NATIONALITY

US Citizen

iProcedures, Tampa FL (Remote) — *Lead Software Developer*

MAR 2016 - OCT 2018

- Developed a cloud-based mobile Anesthesia Information Management System (AIMS).
- Developed a real-time vitals monitor using the D3.js charting library.
- Created Windows and Mac desktop applications using Electron.
- Automated versioning and deployment system to deliver updates to clients using Azure DevOps Services.
- Peer reviewed junior developers using the Gitflow workflow.

Toptal, San Francisco CA (Remote) — *Software Developer*

SEPT 2015 - MAR 2016

The Learning Experience

- Created Bubble's U, a children's learning platform, for a nation-wide academy of early education.
- Developed in Angular v6 with custom UI components.
- Challenged with creating a unique, fun, child-usable web experience.
- [link](#)

Herndonwood Associates

- Created ReKoN, a risk management platform, for a banking institution.
- Developer in C#.Net using MVC pattern and JQuery Bootstrap frontend.
- Implemented Azure as the cloud server and storage solution.
- Created a multi-level role system.

Wolters Kluwer Law & Business, Tampa FL (Remote) — *Software Developer*

JAN 2014 - SEPT 2015

- Developed MediRegs, a medical coding suite, for a global provider of technology solutions.
- Built a tool that uses fuzzy logic to find ICD10 codes.
- Built with C#.Net and Angular.js in the Azure cloud.

Mad Mobile, Tampa FL — *Software Developer*

NOV 2012 - OCT 2013

- Built the Office Depot Windows Store app.
- Worked with the Office Depot development team to create a custom API.

AgileThought, Tampa FL — *Software Developer*

AUG 2012 - NOV 2012

- Built custom software using C#.Net with knockout.js frontend.

Mad Mobile, Tampa FL — *Software Developer*

DEC 2011 - AUG 2012

- Converted several eCommerce websites into mCommerce mobile websites.
- Scraped HTML from the websites and presented the data as JSON through a RESTful C#.Net Web API.

Enporion, Tampa FL — Junior Software Developer

JAN 2011 - DEC 2011

- Developed an online reverse auction website for municipality utilities.
- Built with C#.Net MVC and Adobe Flex.

Raytheon, Largo FL — Junior Software Developer

MAY 2009 - JULY 2010

- Developed software for a major U.S. Defense company.
- Developed a tool to automate calibration of electrical equipment in Basic. (Voltameter, oscilloscope, etc.)

EDUCATION

University of South Florida, Tampa FL *Master of Science in Computer Engineering*

2011

GPA: 3.25

Eta Kappa Nu Honor Society President

PUBLICATIONS

Let's Build a Hacker News Clone with Dotnet Core and Angular

2020

YCombinator's infamous Hacker News has been a reliable source of news for the hacker community and, over time, has garnered the attention of hipsters and hustlers. Today we are building an app that displays the best stories from Hacker News.

Build Ultra-Modern Web Apps with Angular Material

2016

Material Design uses a paper metaphor, bold intentions, and meaningful motion to give user interfaces an ultra-modern feel. Web applications built using AngularJS can now easily adopt these design principles using Angular Material, a reference implementation of Google's Material Design Specification.
