NATIONALITY

US Citizen

Wolters Kluwer Law & Business, Tampa FL (Remote) — .Net Developer

JAN 2014 - SEPT 2015

- Developed a medical coding suite.
- Built a tool that uses fuzzy logic to find ICD10 codes.
- Built in the Azure cloud.

Mad Mobile, Tampa FL — Windows 8 Developer

NOV 2012 - OCT 2013

- Built the Office Depot Windows Store app.
- Created an eCommerce Windows app for a major online retailer.
- Connected to a custom API developed by Office Depot.
- Allowed users to see special deals, read product reviews, and add items to their cart.
- Displayed closest store by using geolocation.

Agile Thought, Tampa FL — .Net Developer

AUG 2012 - NOV 2012

- Built risk analysis software using the .Net Microsoft stack.

Mad Mobile, Tampa FL — .Net Developer

DEC 2011 - AUG 2012

- Converted several eCommerce websites into mCommerce mobile websites.
- Scraped HTML from the websites and presented the data as JSON through a RESTful .Net Web API.
- Architected an extensible application core used as the base for all of the mobile sites.

Enporion, Tampa FL — Adobe Flex Developer

JAN 2011 - DEC 2011

- Developed an online reverse auction website for municipality utilities.

Raytheon, Largo FL — Basic Developer

MAY 2009 - JULY 2010

- Developed a tool to automate calibration of electrical equipment in Basic. (Voltmeter, oscilloscope, etc.)
- The tool shrunk a 6 hour calibration process down to ten minutes.

EDUCATION

University of South Florida, Tampa FL *Master of Science in Computer Engineering*

2011

GPA: 3.25

Eta Kappa Nu Honor Society President

PUBLICATIONS

Build Ultra-Modern Web Apps with Angular Material

2016

Material Design uses a paper metaphor, bold intentions, and meaningful motion to give user interfaces an ultra-modern feel. Web applications built using AngularJS can now easily adopt these design principles using Angular Material, a reference implementation of Google's Material Design Specification.

A Dynamic Hierarchical Web-Based Portal (Master Thesis)

2011

A dynamic hierarchical web-based portal was created to house a suite of web-based supply chain management applications. The portal was designed in a hierarchical manner to match the structure of large companies. Administrators of the portal have the ability to form the portal in such a way to mimic the existing structure of their company.
